With out predujice A leading UK newspaper tried to run this story, but had the item quashed by high-level Government intervention."fixed line microwave" equipment to make people sick.This type of equipment

TETRA antenna SUSSEX uk OUT OF CONTROL HOW MUCH WAS SPENT ON THIS LAST YEAR ASK YOU M.P ? research has led me to uncover a truly nation-wide mind control weapon system. Each UK police station is equipped with a vast array of microwave antennae. The Sussex Police headquarters has a two hundred foot antenna. The building is surrounded by a fence and is off limits to the public. This microwave complex sits in the middle of a council housing estate, which means the people in this area are being bathed in low level microwaves. New research has shown that low level microwaves give mice cancer, since the emitters tested by the scientists, were the new ultra safe mobile phones which give of much smaller intensities than the police antennae, the Police microwave system is a serious health hazard. It seems that low level microwave radiation excites the hydrogen bonds in the cell and can interfere with meiosis. This causes cell division to go wrong, which leads to cancerous cells and hence tumours.

Secondly, the police have been granted the exclusive use of the 450 MHz microwave frequency range. This is exactly the frequency used by Dr Ross Adey, the CIA mind control expert, in his experiments on behavioural modification. It seems the police have the exclusive use of this mind control frequency and a vast array of antennae to broadcast this frequency all over the country. Very useful for mass mind control in times of emergency. Adey found that by using 0.75mW/cm2 intensity of pulse modulated microwave at a frequency of 450 MHz, it was discovered that an ELF modulation could be used to control all aspects of human behaviour. The Sussex police headquarters is connected to CCTV, closed circuit television cameras throughout the town. Some of these cameras have microwave telemetry devices that could easily be used to broadcast this frequency. The large antennae that bracket the town could also be used

The UK Government is now spending £12.5 million to fully implement a nation-wide deployment of CIA mind-control technology. The TETRA system pulses at 17.6 Hz broadcast at 400 MHz which is essentially the Pandora Project funded by the CIA in the late '60s and early '70s. Dr Ross Adey, the chief researcher on the Pandora Project has released a video to leading UK researchers which proves that not only does the TETRA system cause ELF zombification by massive release of calcium ions in the cerebral cortex and the nervous system, but the activated calcium ions also cause massive hormonal disturbances which lead to frenzied imbalances, emotional and physical states. european antennas, antennas, Based in the UK, Cobham Antenna Systems, ... antennas within 250MHz and 40GHz, for surveillance, security, military, satellite and ... RFID, TETRA, PMR, Data and Cellular Communication Systems. microwave, flat ... These antennas can be used for ground-based and airborne systems, ...

This system will be used by all UK police and emergency services by the end of the year, as the Home Office has sold off all police frequencies, so they are forced to use the new system.

Use of the TETRA system by the police will lead to psychotronically controlled officers who may be totally controlled in any situation and are very useful for states of economic or social chaos where extreme and violent behaviour is needed without any conscious or moral compunction - so-called police robots.

<https://forum.davidicke.com/showthread.php?p=385423>

30,000 transmitters will be placed around the country to maximise the effects on the local UK population - mass mind control. Anyone who has complained of these transmitters has received a letter from the Government informing them that if the transmitters are not positioned where the Government wishes, there can be no guarantee then of police protection, which will lead to higher insurance premiums for the householder.

A leading UK newspaper tried to run this story, but had the item quashed by high-level Government intervention

Dazzler (weapon) - Wikipedia, the free encyclopedia <https://www.usenix.org/conference/usenixsecurity12/feasibility-side-channel-attacks-brain-computer-interfaces>

Brain computer interfaces (BCI) are becoming increasingly popular in the gaming and entertainment industries. Consumer-grade BCI devices are available for a few hundred dollars and are used in a variety of applications, such as video games, hands-free keyboards, or as an assistant in relaxation training. There are application stores similar to the ones used for smart phones, where application developers have access to an API to collect data from the BCI devices.

The security risks involved in using consumer-grade BCI devices have never been studied and the impact of malicious software with access to the device is unexplored. We take a first step in studying the security implications of such devices and demonstrate that this upcoming technology could be turned against users to reveal their private and secret information. We use inexpensive electroencephalography (EEG) based BCI devices to test the feasibility of simple, yet effective, attacks. The captured EEG signal could reveal the user's private information about, e.g., bank cards, PIN numbers, area of living, the knowledge of the known persons. This is the first attempt to study the security implications of consumer-grade BCI devices. We show that the entropy of the private information is decreased on the average by approximately 15 % - 40 % compared to random guessing attacks.

Scientists Successfully 'Hack' Brain To Obtain Private Data

BERKELEY, Calif. (CBS Seattle) – It sounds like something out of the movie “Johnny Mnemonic,” but scientists have successfully been able to “hack” a brain with a device that’s easily available on the open market.

Researchers from the University of California and University of Oxford in Geneva figured out a way to pluck sensitive information from a person’s head, such as PIN numbers and bank information.

The scientists took an off-the-shelf Emotiv brain-computer interface, a device that costs around \$299, which allows users to interact with their computers by thought.

The scientists then sat their subjects in front of a computer screen and showed them images of banks, people, and PIN numbers. They then tracked the readings coming off of the brain, specifically the P300 signal.

The P300 signal is typically given off when a person recognizes something meaningful, such as someone or something they interact with on a regular basis.

Scientists that conducted the experiment found they could reduce the randomness of the images by 15 to 40 percent, giving them a better chance of guessing the correct answer.

Another interesting facet about the experiments is how the P300 signal could be read for lie detection.

In the paper that the scientists released, they state that "the P300 can be used as a discriminative feature in detecting whether or not the relevant information is stored in the subject's memory.

"For this reason, a GKT based on the P300 has a promising use within interrogation protocols that enable detection of potential criminal details held by the suspect," the researchers said.

However, scientists say this way of lie detection is "vulnerable to specific countermeasures," but not as many compared to a traditional lie detector.

This could only be the beginning of a new form of fraud. Scientists say that a person with their guard lowered could be "easily engaged into 'mind games' that camouflage the interrogation of the user and make them more cooperative."

Also, much like other household electronics, "the ever increasing quality of devices, success rates of attacks will likely improve." in this video were more powerful than you can ever know hear is what a Professor of Experimental Philosophy said Gerry Gilmore (gil@ast.cam.ac.uk) Sent: Star wars project, which no doubt involves some of your objects. AWACS Airborne Warning and Control System can use a cell phone and tower to heal your body and mind is that possible?, many organic substances like amino acids and proteins have a charge separation within the molecule. If the molecule changes shape, these charges will change position, and there will be a local change in the charge separation, on the scale of one molecule.

- Its not easy to compress a large number of proteins floating with random orientations in a fluid, and to have their charges change in a consistent direction.
- The salty fluid of our cells would tend to "short out" any large-scale charge separation.
- The proteins within the cell are somewhat insulated from the extracellular fluid and other cells by the cell wall.
- Compressing the molecules in the cell wall will not produce an external charge, since the structure of the cell wall is

fairly symmetrical.

- Its not easy to collect any charge, since dry skin is a reasonable electrical insulator.

most liquid-dissolved proteins in a living body could be usable as piezoelectric sources. (On the other hand, enamel in teeth is a crystalline solid, and is more similar to bone -

the speed of transmission via liquid crystals matched the speed of nerve impulses far better than any electrical signal-type proposal.

Nerve impulses travel at 0.5 - 120 m/s, and rely on the physical movement of Calcium & Potassium ions across a nerve cell membrane, transverse to the direction of propagation.

- Electrical signals in wires travel about 200,000,000 m/s, and relies on the physical movement of electrons in a metal, in the direction of propagation. This is clearly much faster than nerve impulses.

Optical changes in liquid crystals rely on the physical movement of molecules, so I imagine the speed of this action would be closer to nerve impulses than to electrical signals in a wire.

can use a cell phone and tower to heal your body and mind is that possible?, you are in an area that is ... digital signal processors as well as various types of electrical power ... The human body has its own low level (around 10 hertz)

you could use some signals radiating wireless to the effect of feeling good or even healing the mind of illness, the phone labs know this secret but they use it in other ways resulting effects that could harm our body. read the resurch from crystal aspect of the human body? Can you put electricity into a person in some special way to make a person vibrate? How can this be useful in any way. Many cells in the body are sensitive to electric fields - and not just nerves, which use electric fields to conduct nerve impulses.

Electric fields help move ions in and out of cells, and, on a smaller scale, fold proteins into the right shape, lock enzymes onto their targets and cause chemical reactions to happen.

that the human body has piezoelectric properties WHAT I want to know is why. Why does the human body posses these properties? How can you tap into it's power?

From the articles I've read it appears to have tremendous healing effects. For example, piezoelectricity helps bones heal, what if you could supply a small current through the bone, would in help the bone heal faster? It's stuff like that which im interested in.

The structure of bone is being continually being remodeled by osteoblasts and osteoclasts to take into account the varying stresses which are experienced in life. It has been claimed that some bone fractures that do not heal well have been helped by a small electric or magnetic field, so perhaps piezo electricity in bone provides some information on the location of stress and strain, which directs the operation of this bone remodelling?

Some claimed therapeutic applications of electric fields: <http://en.wikipedia.org/wiki/Electrotherapy>.

The structure of cell membranes are one form of liquid crystal, with a thin fat-soluble layer surrounded by water on both sides.

This also applies to animal and bacterial cells.

Piezoelectric substances are usually insulators, with charged atoms in fixed positions within their regular crystal structure. When you physically deform them, the electric charges in the substance are displaced in a regular manner, and so an overall electric charge appears at the surface. With suitable electrodes and circuitry you can collect some of this charge, and accumulate it to do some useful work - like make a spark in a piezoelectric gas lighter, or produce an audio voltage in the old-fashioned piezoelectric microphones or the slightly more modern hydrophones.

However, if you surround the piezoelectric substance by a conductive fluid, any charge separation appearing on the surface will be "shorted out" by the surrounding fluid. The human body is filled with a salty, conductive fluid, so you can't really generate useful electricity in this way (it will be shorted out). However, if the cells embedded in bone were sensitive to electricity they could use niezoelectricity as some sort of signal (bone is a solid niezoelectric substance)

sensitive to electricity, they could use piezoelectricity as some sort of signal (some is a solid piezoelectric substance).

the piezoelectric property is one of the most interesting and unknown features of the world. However, it is present on the electronic compartments of everyday equipment.

Despite this, it has been described that it is also present in the human body.

First of all, what means piezoelectric? Piezoelectricity implies that one an object is electrical stimulated it will generate MICROdeformations. However, when mechanical stimulated an electrical current is also generated.

Second, it is present in almost every single organ of your body, but not all of them. Almost all biological matter, including DNA, collagen, keratin, and enamel possess piezoelectricity. Once this proteins belong to the extracellular matrix of almost every organ bone, skin, among other organs also manifest this property?

So, why living tissues need it and why it is manifested?

This phenomenon arises from the fact that almost all proteins present in the human body present a crystalline structure which is the main requisite to the piezoelectric phenomenon.

In 1967, Morris Shamos and Leroy Lavine postulated that piezoelectricity is a "fundamental property" on biological tissues, since it may play a significant role in several physiological phenomena. This is easily observed on lifters!! If you check the bone mass present on their legs is higher than a common person! But why?? It has been hypothesized that once they subject the bone of the legs to mechanical stimuli and due to the bone' piezoelectricity, collagen reorganizes its dipole and shows negative charges on the surface, which induces charged amino acids to promote electrostatic interaction with calcium and phosphate ions, only in areas of the bone that is subjected to compression forces.

liquid piezoelectric crystal

I was doing some research into the electrical properties of humans and I found out that the entire body acts like a "piezoelectric crystal"

The IC-R3 does provide some excellent features as well as 0.495 to 2450 MHz coverage in AM, FM and wideband FM modes. The video coverage is 30 – 2450 MHz for TV.

900 to 2450 MHz coverage in FM, FM and Modulated FM modes. The FM coverage is 900 – 2450 MHz for FM (standard AM as used by standard broadcast TV), but FM TV coverage is from 900 – 1300 and 2250 to 2450 MHz, covering the 23 & 13cm amateur television and other video applications such as CCTV cameras, video baby monitors and some outside broadcast cameras and helicopter downlinks.

The IC-R3 is excellent for television DX (see earlier), and for short range monitoring of ATV and CCTV cameras. You can of course watch standard television on it with does happen to be useful if you want to catch the news or football when you are out somewhere! However I must admit that the video receiver is prone to image reception (particularly from strong digital cellular transmissions which appear as noise), and sensitivity could be better for video in the 2250 to 2450 MHz area. The IC-R3 tuned to a wireless camera on 2468 MHz, outside the advertised range

which ends at 2450 MHz. Allowing full coverage of the ISM band up to 2483 MHz

and beyond. A recent addition to my own monitoring capabilities, the Misumi_WCS99XIIS has proven to be an excellent investment. It covers the 900 to 2700 MHz range, and is capable of receiving frequency modulated NTSC or PAL video signals (not SECAM). Its very sensitive and using just the supplied twin set-top SMA aerials, received the amateur television repeater GB3EN from about 7 miles away at Finsbury Park. It will receive a 10 mW wireless camera from a line of sight distance of approximately 150 metres/500 feet. Uses an SMA connection and runs on 2 AA cells or external 5V supply.

CORONATION OATH, HER MAJESTY QUEEN ELIZABETH II JUNE 2, 1953

"REIGN" VS. "RULE" Transcript of the original Coronation video, herein is the dialogue between the Queen and officials of the Church of England at Her Majesty's Coronation. . . . dedicating herself before God, to the service of her subjects." "Madam, is Your Majesty willing to take the Oath?" [HRM states] : "I am willing." "Will you solemnly promise and swear to govern the peoples of the United Kingdom of Great Britain and northern Ireland--Canada, Australia, New Zealand, . . . according to their respective laws and customs?" [HRM states] : "I solemnly promise so to do." "Will you to your power, cause Law and Justice in mercy to be executed in all your judgments?" [HRM states] : "I will." "Will you, to the utmost of your power, maintain the Laws of God and the true profession of the gospel?" "Will you to the utmost of your power, maintain in the United Kingdom, the Protestant Reformed religion established by law?" "Will you maintain and preserve invariable, the settlement of the Church of England--and the doctrine, worship, discipline and government thereof, as by Law established in England? And will you

. NOTICE TO PRINCIPLE IS NOTICE TO AGENT, NOTICE TO AGENT IS NOTICE TO PRINCIPLE. Dear Mr david cameron and HER MAJESTY THE QUEEN ELIZABITH THE 2ND AND THE cica and CPS chichester council west sussex cabnet office CPS ref number mv 47WC5808115/RR chief of police martin richards mrs K bourne crime

case. I cannot enter or refer number my 47WC5808115/RR to either of police station records nor to the same crime commission and cabinet office of Chichester Council, THIS IS A NOTICE a lawful document. It informs you. It means what it says. Any reply to this lawful Notice must be done on oath or attestation and on your full commercial liability and penalty of perjury. Whereas I have served un-rebutted Notices on the (alleged) HOVE CPS ref number my 47WC5808115/RR plc, and that I do not consent to their unlawful jurisdiction or the making of UNLAWFUL concealing of my child abuse evidence against myself/legal person and/or agent thereof, and whereas they are continuing to concealing my legal person/agent by keeping my property doctors letter of my treatment of child abuse social service files of child abuse and imposing unlawful concealing judgement conditions that prevent me from my human right to justice to bring the man Tony Tidy Fletcher to court for his action on me of child abuse, whilst no proof of Jurisdiction has been forthcoming, and that this was demanded in my lawful notices, and that I am a living being, and that I have 'lawful reason' not to comply to this treasonous regime of governance concealing my child abuse evidence, nor any other unlawful authority legislating under a foreign jurisdiction. HMCS, CICA, CPS GOV MUST CEASE AND DESIST CONCEALING MY CHILD ABUSE IMMEDIATELY. Furthermore, If I am forced under duress to STOP COMPLAINING ABOUT THE CONCEALMENT OF MY CHILD ABUSE and/or be incarcerated TAKE NOTICE for this will be an unlawful enforcement of legislation and/or enforced coercion demanding that I commit a criminal offence by paying into the coffers of a treasonous regime, and/or be incarcerated for being no more than a "loyal subject of the realm. "Of which I can prove unquestionably that I am. Whilst being in full knowledge of, and with evidence that, Treason has and is still being committed to this very day, and that I have entered into lawful APEAL, therefore it is my duty as a "loyal subject of this realm" not to comply with this present system of unlawful CONCEALMENT governance and, it is my duty to distress and distrain the CONCEALMENT and also to APEAL DEMAND and repel the will of all/any public servants that are not supporting the barons committee at this time, until such times as they do. Any demands that the (alleged) APEAL AGAINST THE CPS CICA Magistrates court plc and or Chichester Crown Court plc HIGH COURT CABINET OFFICE make on myself/legal person, will be challenged in a properly convened de jure of 12 impartial subjects under the common law of the land as to my common law rights and, habeas corpus and, any hearing(s) must be conducted in open forum as to my constitutional common law rights. Any hearing with regard to the matter of CONCEALMENT OF CHILD ABUSE UNDER A OATH OR POLICE ACTING UNDER THERE OATH OR ANY PARTY SOLICITOR OR DOCTOR ACTING UNDER THERE OATH IS Treason must surely be heard in public forum as it is obviously in the public interest to do so. In light of the evidence presented herein I DEMAND that HMCS, CICA CPS CEASE AND DESIST in CONCEALING MY CHILD ABUSE me further without lawful cause to do so, Any further CONCEALMENTS from the (alleged) CPS HOVE CPS ref number my 47WC5808115/RR CICA DOCTORS POLICE SOLICITORS OR Magistrates court plc or Chichester Crown Court plc, or any of their representatives, will result in a breach of my fee schedule of no less than £1,000,000.00p (One million) GB pounds (or gold/silver equivalent, as to my discretion), which shall be the standard sum for each and every breach of my rights from now on in that causes me or my family to suffer further distress incl; letters, telephone calls, visits by police or Bailiff's or any other third party agent representative of the office of the crown and/or acting on behalf of unlawful legislation enforced by the (alleged) court services. stand under full commercial liability and penalty of perjury as the chief administrator and executor for the Legal person and, as the beneficiary of the trust in any hearings forced or otherwise with regard to the crown/magistrates court, and any subsequent administration thereof. No hearing may be heard in private or in chambers, ALL forced hearings or otherwise, shall be heard in public forum under common law jurisdiction as to my established common law rights. NEW FEE SCHEDULE (Non-negotiable instrument).1.) For ANY unlawful legislative demands made or enforced against my legal person and/or agent thereof, I demand a fee of £1,000,000.00p (One Million) GB pounds (or gold/silver equivalent), PER INCIDENT (To be paid within 30 days on receipt of the demand for payment). IN ADDITION to the above demanded fee a further fee schedule exists as follows;2.) For ANY ORDER unlawfully demanded against my legal person and/or agent thereof, no matter how trivial it may appear to be, by ANY officer, Judge, Magistrate or any other person/body presuming such an administrative role, I demand an additional £1,000,000.00p (One Million) GB pounds (or gold/silver equivalent), PER ORDER GIVEN;3.) For ANY unlawful transgressions against my legal person and/or agent thereof, that causes either to suffer physical harm, pain or emotional stress/anxiety or resulting in either to suffer any undesired physical affect whatsoever, I demand an additional fee of £500,000.00p • Network Map
